Complete range of technical work garments.

THE COMPLETE LINE
OF WORK GARMENTS.

HIGH QUALITY WORK GARMENTS.

DEUTZ-FAHR GREEN LINE is the special selection of workwear dedicated to farming professionals and to all those who are proud to work every day with a DEUTZ-FAHR machine.

Every garment is developed for total practicality at work. Through meticulous attention to detail, these garments combine comfort and extraordinary freedom of movement with an elegant design.

The new **DEUTZ-FAHR GREEN LINE** range includes every item of technical clothing you'll need for your work: with overalls, trousers, jackets, socks and underwear.

Discover the complete range of **DEUTZ-FAHR GREEN LINE** work garments.

TC TWILL FABRIC

TC diagonal weave fabric is a mixture of polyester and cotton in a blend maximising both durability and breathability.

TC fabrics hold their shape even after many high temperature washes, are highly shrinkage resistant and heat resistant, and are extremely durable and hygroscopic.

PRACTICAL

- ▶ Rip-resistant and extremely wear resistant fabric
- ▶ High quality YKK zip fasteners
- ▶ Printed graphics resistant to industrial washing and drying
- ▶ Shrinkage less than 5%
- ▶ Triple stitching
- ▶ Resistant to heat and direct sunlight

SAFETY

- ▶ High visibility with reflective piping
- ▶ Reflective printed DEUTZ-FAHR logos

COMFORT

- ▶ Soft, comfortable fabric
- ▶ Exceptional mobility
- ▶ Ergonomically adjustable for superior wearability

STYLE

- ▶ Elegant design
- ▶ Press stud buttons with logo
- ▶ DEUTZ-FAHR branded labels and stitching

The DEUTZ-FAHR professional overall is designed to be extremely practical, with numerous pockets and details created with heavy duty usage in mind, such as interior pockets for removable knee pads, for total comfort at work.

Various double pockets, a mobile phone holder, a pen holder, an inside pocket and different types of fasteners are just some of the features that make this overall great for every possible necessity.

The waist is easily adjustable with extension straps for maximum wearability, while expansion pleats along the back allow extraordinary freedom of movement.

The 280 g/m² diagonal weave TC fabric is made from a blend of 65% polyester and 35% cotton and is both UV and wear resistant. The stitching is reinforced, while the garment can be washed easily in the washing machine at 60°C.

For users who prefer the practicality of two-piece garments, DEUTZ-FAHR has created a work jacket with matching full length or knee length trousers.

An elegant, modern design makes these garments suitable for any time of your day.

The jacket features four front pockets, including one double pocket, a pocket with pen holder and an interior pocket.

All the fasteners are press-studs branded with the DEUTZ-FAHR logo in relief.

The 280 g/m² diagonal weave TC fabric is made from a blend of 65% polyester and 35% cotton and is both UV and wear resistant. The stitching is reinforced, while the garment can be washed easily in the washing machine at 60°C.

Seamless, for total comfort

Water repellent treatment for perfect insulation

Elasticated, sculpted fabric to fit both men and women

Insulates from both cold and heat, breathable and fast-drying

Ideal for work, leisure and sport

TECHNICAL FABRIC.

Thermal technical fabric was created to answer the specific needs that sports and mountain life imply.

Worn in direct contact with the body, this fabric lets the skin breathe naturally, leaving it warm and dry.

This is made possible by a polypropylene fibre with potent water repellent properties, which carries moisture outwards and expels it to keep the body at the ideal, comfortable temperature.

The soft stretchiness of this fabric lets it follow the movements of your body without hindering you and keep it snugly covered. This is also achieved by zones of different elasticity and pressure in different parts of the garment intended specifically to maximise ergonomics.

DEUTZ-FAHR socks are designed for intense usage, whether at work or for sport. The textiles and their technical characteristics have been specifically selected for maximum comfort and durability, combined with superior antibacterial properties and breathability.

Natural cotton is a high quality, durable fibre. It is highly wear-resistant and comfortable, an effective insulator, while its excellent air circulation and moisture-wicking properties offer the wearer a sensation of dryness.

Prolen Siltex is a fibre modified with an antibacterial agent based on biogenic silver ions (Ag+) to reduce the growth of bacteria, fungi and mould.

Lycra is a resilient fibre with renowned elastic properties ensuring extraordinary dimensional stability and comfort.

Coolmax is a fibre with special technical characteristics ensuring excellent air circulation and moisture-wicking properties.

CODE M03D049, short socks
CODE M02D02, medium socks
CODE M02D019, long socks

Short version for women and children, with horizontal white-green-blue stripe pattern and DEUTZ-FAHR logo

The independent zone structure effectively cushions the feet against shocks, relieves stress and protects the Achilles tendon

85% NATURAL COTTON
13% PROLEN SILTEX
2% LYCRA

Pair of V-neck t-shirts in white or black, with DEUTZ-FAHR logo patch on left sleeve cuff.
